

ABOUT THE PROJECT

Creating an efficient and non-threatening space was top of mind for this leading hospital's pediatric emergency department. Bright graphics applied to glass surfaces add splashes of color and an element of privacy to meeting spaces, while maintaining an open atmosphere. Sliding barn doors make the most of the space. Power and data infrastructure tie cleanly into the low-wall nurses station, while Healthcare Optifiller seals the narrow spaces between the Enzo Approach tiles for infection control and easy cleaning.

SOLUTIONS

- Barn doors
- Solid, glass walls
- DIRTT Millwork
- DIRTT Accessories
- Healthcare Optifiller

FINISHES

- Enzo Approach
- Clear tempered glass
- Chromacoat
- Anodized aluminum
- Thermofoil
