

ABOUT THE PROJECT

Sharing their history and culture was an important design consideration when this First Nations community built its early learning center. Digital graphics behind Corning® Willow® Glass, designed by local artists with input from Whitecap elders, line the entry rotunda and hallway. Imbedded technology provides a powerful teaching tool, while writeable and magnetic surfaces offer a durable, flexible learning space.

SOLUTIONS

- Cladding walls
- DIRTT Power
- DIRTT accessories
- Imbedded technology
- WriteAway™ surfaces
- Magnetic marker board

FINISHES

- Corning® Willow® Glass
- Thermofoil

ARCHITECT/DESIGNER

Ted Rusick Architect
