

# FRESHDIRTT

HOSPITALITY | Chicago, IL

ISSUE #403

## ABOUT THE PROJECT

Engaging collaborative spaces. Live greenery and crisp decor replacing plastic bamboo stalks. Imbedded technology that can be quickly and easily updated. This Chicago hotel gained all this and more – with a short, seven-day installation – when they renovated their lobby area to create an engaging, welcoming and lively environment to greet guests. Freestanding DIRTT structures with imbedded monitors and Breathe Living Walls make the most of natural light and bring new life to the open space. And when the client decided after installation that the monitors were too low, DIRTT's flexibility and precision accommodated a quick tile swap with minimal new hardware and no impact to the schedule.

The new lobby will also serve as a high-end dining and event space ... with fresh herbs from the Breathe Walls!

## SOLUTIONS

- Solid walls
- Breathe Living Walls
- Cornice

## FINISHES

- Back painted glass
- Powder coat
- Thermofoil

## DISTRIBUTION PARTNER

Corporate Concepts

Freestanding surfaces incorporate imbedded technology and natural plants.
